DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.
This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.
In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-6 and 8-9, drawn to a polynucleotide, chimeric gene, host cell, first method of using and first method of making.

Group II, claim(s) 7, drawn to a second method of making the polynucleotide.

Group III, claim(s) 10, drawn to a second method of using the polynucleotide.

In addition to an election of one of inventions I-III listed above, in accordance with 37 CFR 1.499, applicant is required to elect one of the following inventions A-E to which the claims must be restricted.

Group A, drawn to a polynucleotide of SEQ ID NO: 1 or corresponding polypeptide of SEQ ID NO: 2.

Group B, drawn to a polynucleotide of SEQ ID NO: 3 or corresponding polypeptide of SEQ ID NO: 4.

Art Unit: 1638

Group C, drawn to a polynucleotide of SEQ ID NO: 5 or corresponding polypeptide of SEQ ID NO: 6.

Group D, drawn to a polynucleotide of SEQ ID NO: 11 or corresponding polypeptide of SEQ ID NO: 12.

Group E, drawn to a polynucleotide of SEQ ID NO: 13 or corresponding polypeptide of SEQ ID NO: 14.

2. The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Group I is a polynucleotide, method of making and method of using the polynucleotide which is structurally and functionally divergent from the methods of Group II and III. Where multiple methods of use and methods of making of a product are claimed, Applicant is entitled to unity of invention between the product and the first claimed process only. See 37 CFR 1.475(d).

3. The inventions listed as Groups A-E do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Though each of the listed polynucleotides is asserted to be plant sugi homologs, each of the polynucleotides is structurally divergent, isolated from different plants and each of the polynucleotides encodes a divergent polypeptide. Accordingly, the recited polynucleotides lack a common property or activity directed to a common special technical feature.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143). In this case, Applicant is required to elect one of groups I-III and one of groups A-E in response to this requirement.

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

6. Papers relating to this application may be submitted to Technology Sector 1 by facsimile transmission. Papers should be faxed to Crystal Mall 1, Art Unit 1638, using fax number (703) 308-4242.
